

Vessel Person in Charge & Client Vessel Representative 2010-2015 SME – Diving/ROV/ Subsea Construction

Client Background

British Petroleum US

Project Description

Subject Matter Experts in Diving/ ROV / Subsea Construction to provide oversight on BP leased IRM vessels in the US Gulf of Mexico.

Solution

Providing qualified, competent, experienced leadership, to deliver projects that exceed client expectations.

Thorough understanding of BP programs and procedures, such as Control of Work, Gulf of Mexico 500 meter practices, Installation SIMOPS, Management of Change, Incident Reporting, MARPOL security requirements, Logistics requirements, US Customs.

Metrics

The VPIC / CVR:

- Is responsible for ensuring all vessel operations are performed safely, efficiently and according to BP guidelines and project procedure.
- Is responsible for ensuring that vessel personnel have the information necessary to plan execution of the work scope efficiently and are prepared for upcoming tasks
- Is responsible for executing the work set forth in the dive plan.
- Key Contacts: Eric Munstereifle and Jason Lira

Results

Daily operations include managing offshore SIMOPS and installation of Deepwater assets, review of technical bids for deepwater Diving and ROV projects in the Gulf of Mexico, Trinidad, Australian NW Shelf, and Irish Sea. Auditing vessels including ROV and Diving plant equipment to IMCA standards. Review of personnel qualification and installation procedures for subsea projects.
